Waiver and Release

I know that running a road race or participating in an organized walking event regardless of the distance, includes an element of risk. I should not enter and participate in Second Chance Run/Walk (hereinafter referred to as "this event") unless I am medically able and properly trained. I agree to abide by any decisions of an event official relative to my ability to complete this event safely and I further agree that event officials may authorize emergency treatment for me. I also understand that although road assistance will be provided, both vehicle traffic and spectators may be present along the course and I assume the risk of participation under such conditions. I further assume any and all other risks associated with participating in this event including but not limited to illness, traveling to and from the event, falls, contact with spectator or other participants, the effect of weather, including temperature, extremes and humidity, and the surface conditions of the roads and sidewalks, all such risks being understood and appreciated by me. Having read this waiver and knowing these facts, and in consideration of the acceptance of my entry, I hereby for myself, my heirs, executors, administrators or anyone else who might make a claim on my behalf, covenant to sue, and waiver, release and discharge Intermountain Donor Services, Second Chance Run and any and all sponsors, supplies, agents, independent contractors, even though liability may arise out of negligence or carelessness on the part of the persons or parties named on this waiver. I also understand and agree that my sponsor may subsequently use, for publicity or promotional purposes my name or pictures of my participating in the event without liability or obligation due me. Entries cannot be accepted without a valid signature. Entries from minors will be accepted only with a parent's or legal guardian's signature.

Forrest Purser, USU Student, Waits for a Liver Transplant

Forrest Purser, 21
Logan, Utah
Waiting for a liver

Forrest Purser, a biomedical engineering student at USU, was diagnosed with a rare liver disease called primary sclerosing cholangitis when he was just 5 years old. The disease caused his liver to scar itself and now it is estimated 15 percent of Forrest's liver is functioning. In March 2007, Forrest was finally put onto the liver transplant list and is still waiting to receive his life saving organ. Forrest is excited to have a fully functioning liver someday and is anxious to enjoy the benefits of a healthier life. He strongly encourages everyone to say "yes" to organ donation!
